

SSF-SWM-SOLID-NL-E1 Installation

Wall Mount Patch & Splice Fiber Enclosure

FEATURES

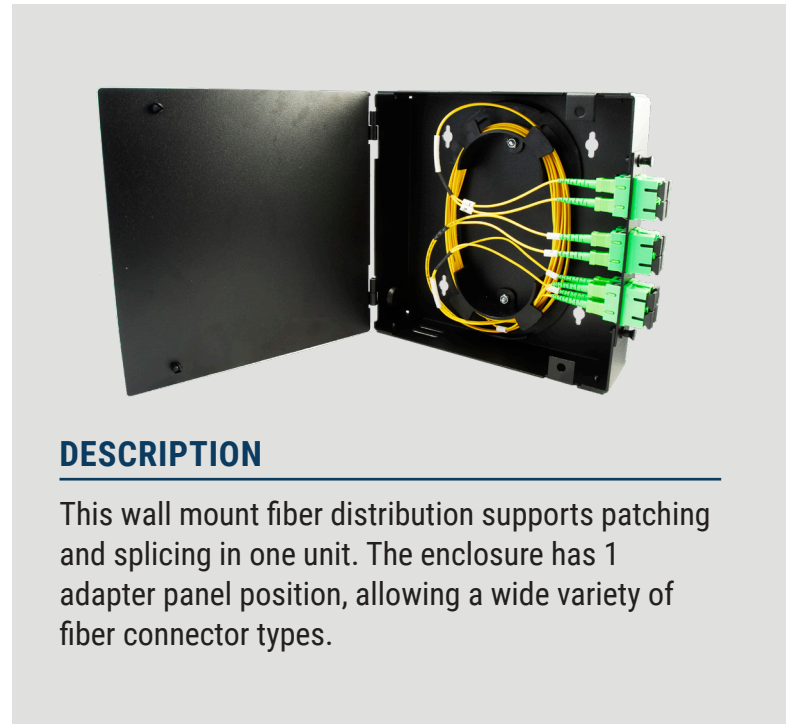

- Accommodates 1 ea SSF™ LGX compatible adapter plates or MTP modules
- Solid door with no lock
- Cable management securing points

INSTALLATION

The SSF-SWM-SOLID-NL-E1 is designed for indoor installation. It can accept one SSF™ adapter plate.

- Select a vertical indoor wall surface with easy access and adequate clearance from other fixtures and power circuits. Installation location should be near a suitable earth ground.
- Utilize a plywood backer board or fastener anchors as appropriate to the install surface.
- Mark and install appropriate wall hanging hardware and secure the unit.

DESCRIPTION

This wall mount fiber distribution supports patching and splicing in one unit. The enclosure has 1 adapter panel position, allowing a wide variety of fiber connector types.
