

Convert individual Cleerline™ LC Connectors to duplex assemblies with Cleerline™ LC Connector clips. Simply snap LC connectors into the clip and go! Our specialized design holds connectors securely, allowing easy connection to duplex ports. Disconnection of the assembly is also simple due to the clip's large push bar, which simultaneously depresses both LC connector tabs.

For ease of identification, each clip features A/B connector labeling. Yellow and white polarity connection tubes are also included in each package. Place tubes on cables prior to terminating cables and installing clips.

Cleerline™ LC Connector Clips are color-coded for use with Multimode, Single Mode UPC, and Single Mode APC connectors. Clips are sold in 100 packs and are fully reusable.

FEATURES AND BENEFITS

- Compatible with Cleerline™ LC Fiber Optic Connectors
- A/B connector labeling
- Cable polarity indication tubes included
- Easy installation and removal

APPLICATIONS

- Premise/Enterprise Networks
- Backbone, Horizontal, and FTTx applications
- Data Center, Enterprise, Broadcast, Industrial
- Defense, Healthcare, and Telco/MSO
- Field repair/replacement
- LAN/WAN connections

Clip installation on SSF-LC-SMUPC Single Mode connectors.
 Connectors sold separately.
